

LED CANOPY LIGHT / PARKING GARAGE LIGHT

SMART 401 SERIES

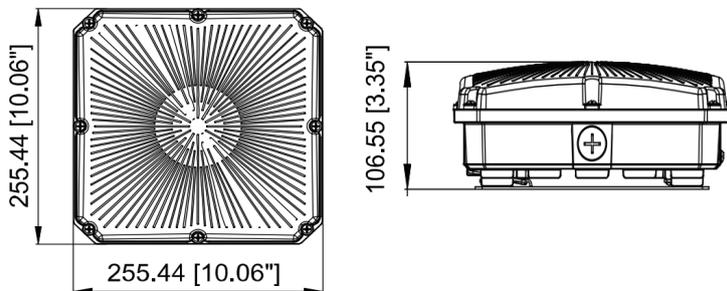

PRODUCT DESCRIPTION:

The Smart 401 Series Parking Garage Light is a highly durable and robust light designed for production areas, parking facilities, and any other low-bay application. The APP combined with the built-in UL dual-channel intelligent driver and Bluetooth sensor, allows you to adjust the CCT, brightness, standby time, set motion detection, and create schedules.

CONTROLS:

- Wireless occupancy and daylight sensor
- Led Driver with built-in wireless BlueTooth module

DIMENSION DRAWING:

FEATURES:

- Samsung lamp beads, Ra>80, luminous efficacy 135lm/W
- Occupancy and daylight harvesting sensor
- Base on Morlink / Silvair Bluetooth Wireless Control
- Built-in backup Driver can be installed
- IP65, suitable for wet places
- Generally used in indoor parking lots or other places
- Compliant with US and Canada or CE codes
- Superior efficacy meets DLC Premium requirements.

APPLICATIONS:

- Parking Structures & Public Areas
- Industrial Facilities
- Walkways & Car Washes

WARRANTY:

- 5-year standard warranty

DIMENSION CHART:

Length	Width	Depth
10.06"	10.06 "	3.55"

Our Smart Lighting Solutions

MORLINK

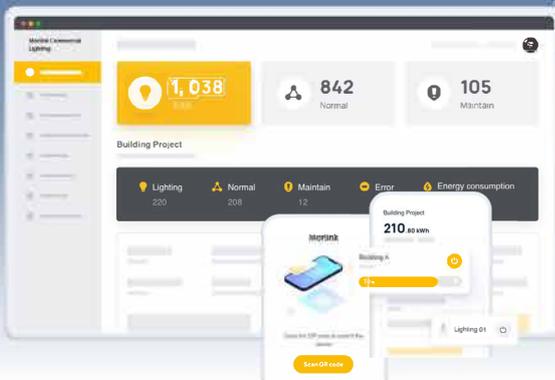

Complete Businesses
Smart Lighting Solution

Q1 Multi-application platform design, integrating Bluetooth, Zigbee and WiFi wireless general technology can realize equipment group control, equipment monitoring and fault diagnosis, scene management, and automation, etc.

Q2 Users can share lighting equipment by equipment category or area on the Morlink SaaS platform, and scan the equipment sharing QR code through the Morlink applet for remote control.

Q3 Support visual management of equipment, large-scale data analysis, user authorization and allocation, site mapping and configuration, and unified management of multiple projects.

SILVAIR

Reliable and energy-efficient
lighting control solution

Silvaire Intelligent Lighting Control System is a wireless lighting control system that uses Bluetooth mesh technology to enable advanced lighting control capabilities. Compared to other competitors in the market.

Compatibility

Compatible with more devices including DALI and 0-10V interfaces. Can be easily integrated into existing lighting infrastructure without major changes.

Capabilities

More advanced lighting control functions can be integrated with other building automation systems to provide a comprehensive solution for intelligent lighting control.

Interface

Friendly interface: Intuitive user interface, can easily control and manage their lighting system and provide configuration and customization services to meet specific user needs.

Scalability

Highly scalable and can be easily expanded as lighting needs grow. This makes it an ideal solution for both small and large-scale projects.
