

LED SMART LINEAR HIGH BAY LIGHT

SMART 400B SERIES

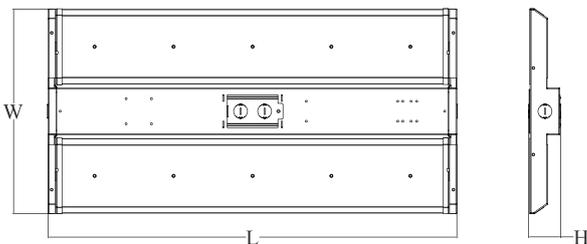

PRODUCT DESCRIPTION:

The LED linear high bay light is an ideal choice for high-performance, long-life replacement of HID and linear fluorescent high bay lights. Various color temperatures and light uniformity will ensure comfortable and safe conditions, thereby maximizing the productivity of warehouses, large shops, stadiums, and other industrial and commercial venues. Through Bluetooth meshed technology and an intelligent control system, brightness adjustment, schedule management, motion detection, group control, and ambient light adjustment can be achieved on App or Saas.

CONTROLS:

- Wireless occupancy and daylight sensor
- Led Driver with built-in wireless BlueTooth module

DIMENSION DRAWING:

FEATURES:

- Available in SOW, 110W, 165W, 225W, 260W and 300W in 120-277V and 347V configurations
- 3-Power & 3-CCT Switchable
- Plug & Play Motion Sensor
- Viewing angle is easily adjustable 20-90 degrees
- Thermoelectric separation technology

APPLICATIONS:

- Warehouses
- Stadiums
- Industrial
- Retail
- High Bay and Low Bay applications

WARRANTY:

- 5-year standard warranty

Our Smart Lighting Solutions

MORLINK

Complete Businesses
Smart Lighting Solution

01 Multi-application platform design, integrating Bluetooth, Zigbee and WiFi wireless general technology can realize equipment group control, equipment monitoring and fault diagnosis, scene management, and automation, etc.

02 Users can share lighting equipment by equipment category or area on the Morlink SaaS platform, and scan the equipment sharing QR code through the Morlink applet for remote control.

03 Support visual management of equipment, large-scale data analysis, user authorization and allocation, site mapping and configuration, and unified management of multiple projects.

SILVAIR

Reliable and energy-efficient
lighting control solution

Silvaire Intelligent Lighting Control System is a wireless lighting control system that uses Bluetooth mesh technology to enable advanced lighting control capabilities. Compared to other competitors in the market.

Compatibility

Compatible with more devices including DALI and 0-10V interfaces. Can be easily integrated into existing lighting infrastructure without major changes.

Capabilities

More advanced lighting control functions can be integrated with other building automation systems to provide a comprehensive solution for intelligent lighting control.

Interface

Friendly interface: Intuitive user interface, can easily control and manage their lighting system and provide configuration and customization services to meet specific user needs.

Scalability

Highly scalable and can be easily expanded as lighting needs grow. This makes it an ideal solution for both small and large-scale projects.
